

# Upgrade Kit Control 5.0

Be in control -  
as you prefer

our performance for your profit

Mayer & Cie. offers upgrade kits for machines that have been in service at our customers already. Instead of buying a new machine, knitters can adapt or convert their existing machines to meet current requirements.

## New, state-of-the-art machine control

Required for using knitlink digital service cloud.

More information

on our website

### Your benefits

With Control 5.0, knitters have two options of controlling and operating their machines.

- ✓ Option one is SmartControl. This means full access from remote via tablet. In that case, there is at least one smart knob at the machine displaying all functions required to operate the machine. This allows assigning different sets of privileges to knitting mill operators and knitters.
- ✓ Customers who appreciate full access to Control 5.0 in one single place can opt for ClassicControl. A control monitor is located within the machine, in the same place as today's control unit.

The new Mayer & Cie. machine control is a prerequisite for using the knitlink digital service apps.

### Available for

- i Circular knitting machines built in 2001 and after can be upgraded to Control 5.0

### Your investment

- i Price list see page 2 (reverse)
