

Flexible bearing of center pipe

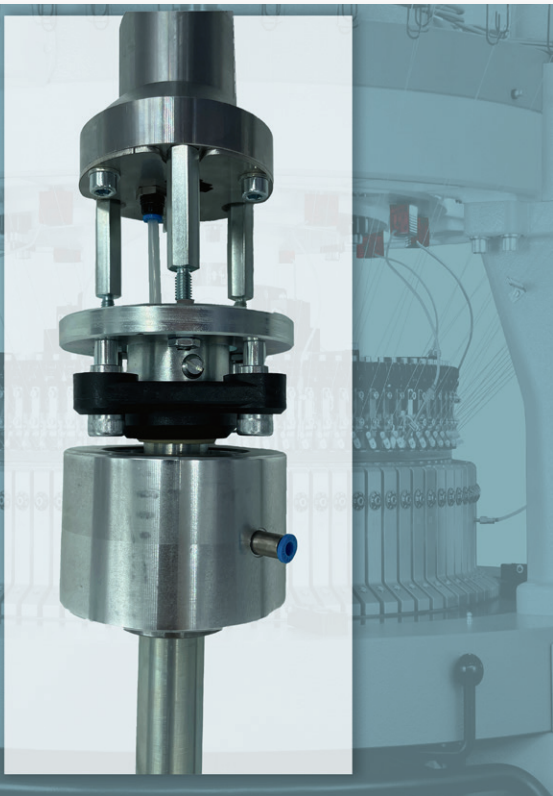

More forgiving to errors in spreader settings

our performance for your profit

Mayer & Cie. offers upgrade kits for machines that have been in service at our customers already. Instead of buying a new machine, knitters can enhance their machines' strengths and bring them to a performance nearing that of a current machine.

More robust knitting performance

Flexibility is the key to the knitting machine's extra sturdiness.

on our website

Your benefits

The center pipe of a circular knitting machine shoulders great forces both from the outside as well as from the inside of the machine. The new, more flexible bearing of the center pipe brings about valuable benefits.

- ✓ Compensation of inaccuracies in spreader settings.
- ✓ Even take-down forces over the entire circumference of the knitted fabric.
- ✓ Less susceptibility to shocks and vibrations from the outside.

Available for

- i both tubular and openwidth circular knitting machines.

Your Investment

- i starts at EUR 450.00
