

High Performance upgrade for your Relanit 3.2 machines

Increase your machines' output - with elastomeric plating* - by up to 30 percent

our performance for your profit

Mayer & Cie. offers upgrade kits for machines that have been in service at our customers already. Instead of buying a new machine, knitters can enhance their machines' strengths and bring them to a performance nearing that of a current machine.

New yarn guiding technology for higher productivity

High performance conversion of existing Relanit 3.2 machines.

Your benefits

The performance upgrade is based on a new, updated yarn guide design that keeps the elastomeric yarn in the correct position. In detail, the performance upgrade features the following benefits.

- ✓ Highest reliability with elastomeric plating at machines' maximum speed.
- ✓ Increased production.
- ✓ Fewer fluff spots thanks to the new yarn guide's design (air-through-hole).
- ✓ Sustainable quality and capacity increase at low cost.

*Triple plating is not guaranteed.

Available for

- i Relanit 3.2 II and Relanit 3.2 S
