

Upgrade Kit **SpeedBooster** for braiding machines

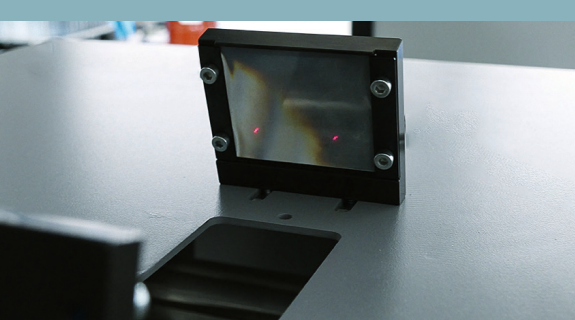

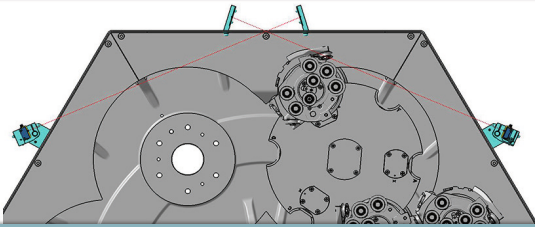

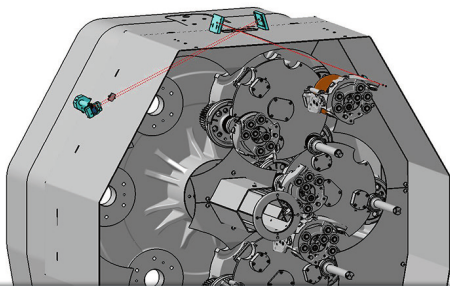

Boost your efficiency

our performance for your profit

With the SpeedBooster Upgrade Kit, users can improve their existing braiding machines efficiency. This means increasing their value or maintaining it in the long term.

Sensor-controlled fill level meter for successive speed increase

Boost performance of up to 10 percent.

Your benefits

The sensor-controlled fill level meter provides exact information about the weight of the coils. Proportional to the decreasing weight of the bobbins, the speed of the machine increases. The SpeedBooster offers the user:

- ✓ Increase in output of up to 10 percent.
- ✓ Controlled stop of machine before idling the bobbin.
- ✓ Compact design.

Available for

- i All MR 11 and MR 15 can be equipped with the SpeedBooster.

Your Investment

- i Please get in touch with us for our individual offer
