

# HORIZONTAL LAY-IN YARN GUIDE FOR JACQUARD MACHINES

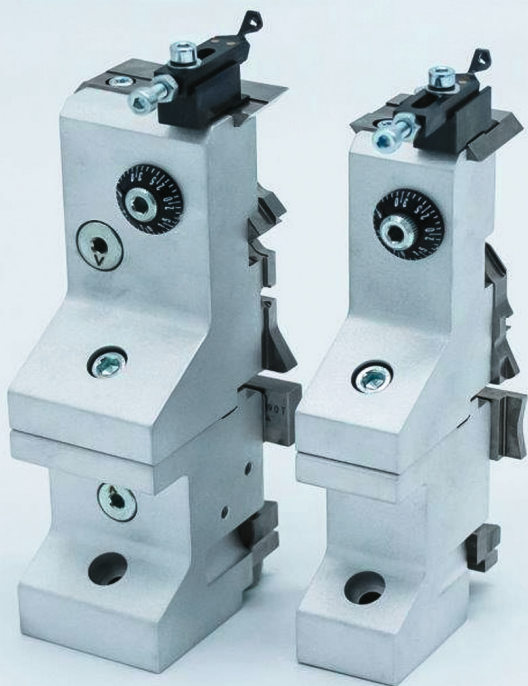

Easier  
handling

our performance for your profit

Mayer & Cie. offers upgrade kits for machines that have been in service at our customers already. Instead of buying a new machine, knitters can enhance their machines' strengths and bring them to a performance nearing that of a current machine.

## Stable and more comfortable handling of jacquard machine

Improved holding down function and no repositioning of horizontal yarn guide.

### Your benefits

- ✓ The lay-in yarns' different thicknesses require an adaptation of the dial height which in turn changes the position of the vertical lay-in yarn guide. The horizontal lay-in yarn guide's position, however, remains unaltered as it is attached to the cylinder cam box. It constantly maintains its correct position.
- ✓ The horizontal yarn guide for lay-in yarns optimally supports the ground thread. In its horizontal direction, it almost entirely omits the yarn's shifting out of the yarn guide.
- ✓ When working with long float designs, the horizontal yarn guide's push down function guarantees less defects through drop stitches.
- ✓ All in all, the horizontal yarn guide makes handling of a jacquard machine simpler and more reliable.

### Available for

- i** For machines in 38" for every 2nd feeder (30 pc)  
OVJA 1.6 E, OVJA 1.6 E (3WT), OVJA 1.6 ET, OVJA 1.6 ET (3WT),  
OVJA 1.6 EE, OVJA 1.6 EE (3/2 WT), OVJA 1.6 EM, OVJA 1.6 EM HS
- i** For machines in 38" for every 2nd feeder (46 pc)  
OVJA 2.4 E, OVJA 2.4 EM

### Your investment

- i** OVJA 1.6 series in 38" for every 2nd feeder (30 pc)  
2,950.00 Euros  
OVJA 2.4 series in 38" for every 2nd feeder (46 pc)  
3,650.00 Euros.
