DIGITAL KNITTING SOLUTIONS

our performance for your profit

knitlink

This is knitlink

The knitlink platform records the operating data of your Mayer & Cie. circular knitting machine(s) and visualises it. On a personalised dashboard, you can view the results clearly presented for all machines and, using the machine view, for the machine selected. In addition, knitlink provides a web shop for machine components and upgrade kits and opportunities for remote support and easier collaboration over long distances. Further functions will gradually be added.

This is how knitlink works

knitlink is based on IIoT technologies. The link with each and every Mayer & Cie. circular knitting machine functions by means of a cloud-based solution that meets highest security standards. Because knitlink works with each machine individually, you can benefit from our tool irrespective of the size of your business.

◆ **Connectivity of all Mayer & Cie. machines (irrespective of location)**

◆ **Cloud- and web-based solution**

◆ **Highest security standards**

◆ **Attractive applications, such as remote maintenance and web shop**
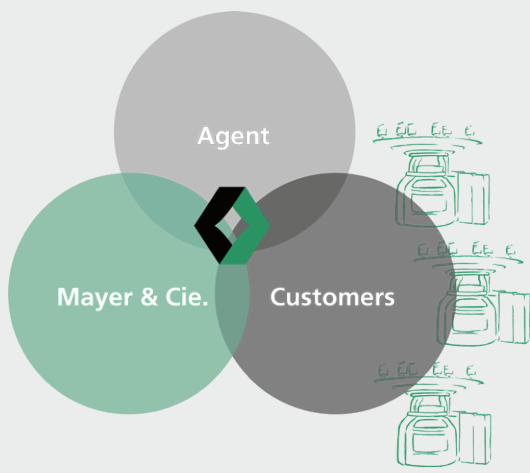

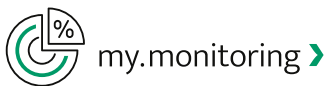

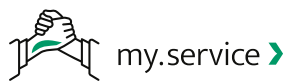

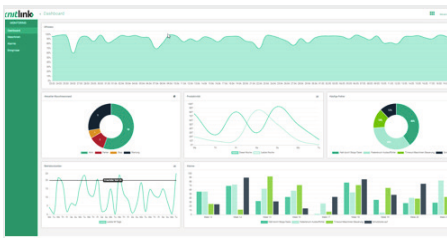

Mayer & Cie.

knitlink

What knitlink delivers

knitlink brings those people closer together whose business revolves around circular knitting: our customers, our representatives and us as machine manufacturers. knitlink bundles our know-how and our service offerings and enables all users to access them online. The platform makes using the machines easier, boosts their efficiency and increases the benefits that a Mayer & Cie. machine delivers.
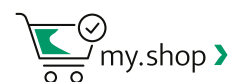

---

my.monitoring ❯

Keeping an overview

At a glance, my.monitoring provides you with all the operating data of one of our machines. Individual aspects can also be viewed in detail – from the machine's status via running times and downtimes to recurring alarms and efficiency by the hour, the day or the week.
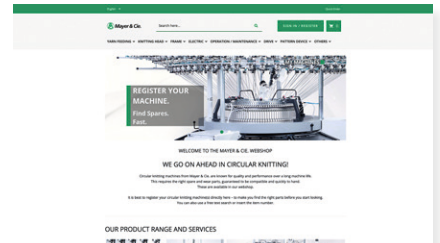

my.service ❯

Always staying within reach

With my.service you (and people you specify) can access your Mayer & Cie. machines at any time from anywhere in the world. In other words, competent support is available remotely and never more than a few clicks away.

my.shop ❯

Shopping without closing times

With my.shop you can order components and upgrade kits for your Mayer & Cie. machine whenever and from wherever you want. Using registered machines, the web shop will quickly provide you with accurate results.

What you need in order to be able to use knitlink

Internet
For Mayer & Cie. circular knitting machines to be connected to knitlink, there must be a stable internet connection. To access knitlink, please visit our website www.mayercie.com.

Control 5.0
The lastest machine control - Control 5.0 either as SmartControl or ClassicControl - is a pre-condition for using knitlink. If your machine is not yet equipped with Control 5.0 ask for the identically named upgrade kit. Find more information on our website or scan the QR code.
