

Convert your S4-3.2 II into an SF4-3.2 III

Excellent value for money

our performance for your profit

Mayer & Cie. offers upgrade kits for machines that have been in service at our customers already. Instead of buying a new machine, knitters can adapt or convert their existing machines to meet current requirements.

Make your single jersey star fit for producing 3-thread fleece

Meet today's demand in light-weight 3-thread fleece within just a few steps.

S4-3.2 II

Conversion kit
S4 3.2 II into SF4-3.2 III

Single jersey star produced
light-weight 3-thread fleece.

SF4-3.2 III

Your benefits

- ✓ Make a well-established and appreciated single jersey expert even more valuable: With the upgrade kit you can remodel your solid S4-3.2 II into a „hot topic“ - a machine for light-weight and elastic 3-thread fleece, the speciality of the highly productive SF4-3.2 III.

It boasts perfect plating of both the binding and ground thread. The fabric produced on an SF4-3.2 III caters for applications in outer wear, leisure wear and sports wear.

Your benefits of an SF4-3.2 III

The SF4-3.2 III produces 3-thread fleece. It is an ideal partner for efficiently knitting athleisure i.e. a combination of sports and leisure wear - as well as outer wear. Further distinguishing characteristics of the machine are:

- ✓ High fabric elasticity.
- ✓ Perfect plating of binding and ground thread.
- ✓ Speed factor up to 990 (33 rpm at 30").
- ✓ Lightweight 3-thread fleece fabrics.

Your Investment

- i** To convert S4-3.2 II into SF4-3.2 III (only available for gauge E20-E24 and anti-clockwise turning direction¹)

Cylinder	Conversion kit „Basic“	Extension 1	Extension 2	Extension 3
	Including cylinder cam box, sinker cam box, ceramic yarn guides, needles and sinkers ² .	1 set of cylinder/sinker ring in gauge E20 additionally	1 set of cylinder/sinkerring in gauge E22 additionally	1 set of cylinder/sinker ring in gauge E24 additionally
