

Expansion kit for MBF 3.2 to a wider range of 3-thread fleece.

Perfect polyester-
cotton plating

our performance for your profit

Mayer & Cie. offers upgrade kits for machines that have been in service at our customers already. Instead of buying a new machine, knitters can adapt or convert their existing machines to meet current requirements.

Boost your MBF 3.2 to light-weight and elastic fabrics.

Keep your MBF 3.2's strong points while expanding the range of possibilities to today's demand in 3-thread fleece fabric.

Expansion kit for MBF 3.2

Boost your MBF 3.2
to light-weight and elastic fabrics.

Your benefits

- ✓ With the expansion kit, you get a perfect solution for lightweight and highly elastic 3-thread fleece fabrics (regardless of the required structure, i.e. 1:1, 2:1 or 3:1). Fabrics are used for outer wear, sports wear and leisure wear.

Technically speaking, the upgraded machine features perfect plating of binding and ground thread and reaches a speedfactor of up to 990 (33 rpm at 30").

Available for

- i Available for: MBF 3.2
